Senior Software Engineer Kapten&Son/Artkai | Germany, Ukraine | Jul 2019 - Oct 2022

As a contractor, I am a full-time out-staff worker in Kapten & Son - a fashion online store with almost 200 employees and 20 million unique visitors per year. I develop features for the store and many different inner web services. On a daily basis, we are using the Spryker & Symfony frameworks.

- Faster delivery to the customer/ Building of web services from scratch for processing orders from checkout through warehouses to final buyers.
- New products launching/ Building of features to provide absolutely new multi-configurable products. I updated existing services so warehouses can process them.
- Optimized work processes/ Connecting a bunch of our services and store' parts to the ERP system.
- Marketing improvements/ Connecting the store to Facebook and Google marketing tools. Developing: a data collector for orders; a promotions sender that is based on abandoned checkouts; a product availability informer; data transfer modules. I am using A/B testing to prove my work.

Lead Software Engineer Talmatic | Ireland, Ukraine | Nov 2018 - Jul 2019

This is a mobile program reinforcing personalized support to help individuals with cognitive disabilities to achieve independence across all of life's domains.

- Got investments for startup/ Refactor not working prototype to stable MVP.
- Optimized existing code and infrastructure/ I made it possible to have local development. I created a single point of proof for the code base from 9 different code bases, 9 different databases, and 6 different mobile applications in 5 timezones.
- Reduced maintenance time from 8 hours to 15 min/ I removed redundant and added new AWS services. I moved the project to docker and implemented CI/CD pipelines.
- New features/ I developed: a user cabinet to create tasks with audio and video in the browser; notifiicator for daily reminders; functionality to build progress reports in pdf.
